

SeqCap Epi

Revolutionize your epigenomic research

SeqCap Epi CpGiant Catalog and up to 210Mb Custom Target Enrichment Solution for Bisulfite Treated DNA

- Efficiently uncover differential methylation with our proven capture technology
- Reveal hidden epigenetic modifications with our innovative probe design
- Experience superior performance with our optimized workflow

SeqCap RNA Enrichment System

More comprehensive transcriptome, less sequencing

SeqCap lncRNA Catalog and up to 200Mb Custom Target Enrichment for workflow simplicity and efficiency

- Achieve unprecedented depth and sensitivity for rare transcript detection
- Maximize the discovery and characterization of novel exons, splicing variants, mutations and gene fusions
- Dramatically increase your sample capacity with the same amount of sequencing through optimized workflow

For life science research only. Not for use in diagnostic procedures.
